

ME-PRO Testimonials

“I have evaluated ME-PRO® in the past and have found it to be an extremely high quality ingredient that possesses all of the key metrics for successful entrance to the feed ingredient marketplace: plant-based, high digestibility, low phosphorus content, 70% crude protein (as fed basis) and non-GM in origin. It also handles well in feed processing equipment and has a positive effect on feed pellet quality.”

Rick Barrows, Ph.D., Lead Scientist, USDA-ARS Fish Technology Center (Retired)

“I am very impressed with ME-PRO®. Its combination of high protein concentration (70% as fed) and digestibility (>98%) as well as balanced amino acid profile are evident. I believe ME-PRO® is well-positioned to capture market share in the feed ingredient marketplace as the demand for high quality protein sources utilized by the aquaculture feed industry continues to rise.”

Dana Nelson, Former Owner, Silver Cup Fish Feed

“ME-PRO® is the single biggest ingredient in our feeds, and will be for a long time!”

David McFarland, Owner, McFarland Springs Trout

“Our ME-PRO®-reared fish provide my farm with the competitive edge to attract premier vendors like Whole Foods. I’m using less feed, my fish are growing great, and customers are thrilled with the taste!”

Peter Fritsch, Owner, Rushing Waters Fisheries
President, Wisconsin Aquaculture Association
Board Member, U.S. Trout Farmers Association
