

## ➤ ME-PRO comparative qualities - Protein and Phosphorus detail

Protein source	Protein concentration	Protein digestibility	Phosphorus content	Phosphorus availability
 ME-PRO®	73.40%	100%	0.45	90.00%
Anchovy meal	65.00%	94.00%	3.10	70.00%
Sardine meal	65.70%	89.00%	3.30	67.00%
Menhaden meal	65.30%	90.00%	3.00	51.00%
Soybean meal	48.20%	88.00%	.68	12.00%

SOURCES: Published and generally accepted data; for general reference only as these protein sources are naturally occurring, involve natural metabolic processes and can have variances due to many factors. ME-PRO® is manufactured to high standards however and the data above can be seen as reliable; performance standards may well improve upon stated. Please always reference the newest ME-PRO “Spec Sheet” as published on the websites of MEProPowered.com and PrairieAquaTech.com.
