

Prairie AquaTech Sustainability position

Sustainability, as a practice and ideal, is foundational to Prairie AquaTech!

As an ingredient innovator and manufacturer of feed ingredients, Prairie AquaTech has identified three crucial areas that guide the company's **Sustainability** vision:

1. Source 2. Performance 3. Environment

- Utilizing raw materials that protect existing forests and protected lands
- Utilizing raw materials that are produced without worker exploitation
- Optimizing material utility through maximizing value-added performance
- Supporting producers that use Sustainable production practices such as no-till, appropriate use of cover crops, clean water management
- Supporting opportunities for third-party oversight in areas of Sustainability and standard certification
- Supporting customers by providing diverse choices that are supported by Sustainable production methods
- "It may not be the easy way but it is the right way."
